

Workflows

Workflow 1: New Relocation Request / Customer Onboarding

Here customer tell QuickMouse: "I'm moving to a new city and I need help!"

Workflow 2: Requirement Clarification & Relocation Planning

Here customer gives unstructured information,

Eg. "I'm moving to Bangalore next month, probably around the 15th. Looking for a 2BHK new whitefield, preferably furnished, budget around 35K. Need movers too."

AI System

↓ convert it into

Destination: Bangalore

Move date: ~15th next month

Property: 2 BHK

Locality: whitefield

Furnished: Yes

Budget: ₹ 35,000

Movers required: Yes

Workflow 3: Property Partner Discovery & Listing Collection

Search property partners and collect available properties for the customer

Eg. Partner A: 2BHK | whitefield | ₹32K | furnished | Available

Partner B: 2 bedroom | furnished, around whitefield, rent 30-35K

AI will understand both and convert them into the same format

Workflow 4: Property Shortlisting & Matching.

"Which of these properties are actually suitable for this particular customer?"

Here matching & Ranking will be done.

Workflow 5: Property Visit Scheduling & Follow up

Mainly Coordination work.

g. Customer: "Can I see Property A tomorrow at 4?"

↓
AI Messages agent

↓
Agent: "4 doesn't work, 5:30?"

↓
AI messages customer

↓
Customer: "Yeah it will work"

↓
AI messages agent

↓
Agent: "Ok, confirmed then"

Current State Management

Like

- Property A - Visit Requested
- Property A - Agent contacted
- Property A - Visit confirmed
- Property A - Visit completed
- Property A - Customer Reject / Select.

Workflow 6: Property Selection & Rental Documentation

After customer visited the property and now decides that

"I want this apartment." | Here focus moves from Searching to Securing the home.

Documents + requirements → Verification + Status Tracking

Workflow 7: Mover Requirement Creation & Vendor Matching

Different cities have different logistics partners, so Vendor matching / ranking based on customer requirements, availability, price, service quality, and route is to be done here.

Workflow 8: Mover Quote Collection & Comparison

Collect the Mover quotes and compare them.

eg. Mover A: "₹12000 including packing & transport, ~~extra~~ Unloading extra."

Mover B: "Total 21K, Packing material included + Insurance 500".

Mover C: "18000 + GST. Loading / Unloading included. Packing additional."

↓
Unstructured partner information

↓
Extraction → Normalization → Comparison → Human decision

Workflow 9: Mover Booking & Confirmation

Customer has selected the mover, Now QuickMove needs to make sure the booking is actually confirmed and everyone has the same details.

- Manage inconsistency here.

Workflow 10: Packing & Pickup Coordination

Mover is booked, now actual physical move begins.

QuickMove coordinates the packing team, pickup time, customer and mover.

Workflow 11: Transportation & Delivery Tracking

The customer's belongings have been picked up. Now QuickMove needs to make sure they reach the destination safely and on time.

Workflow 12: Electricity Connection / Transfer

Once the customer has confirmed home, QuickMove may need to help arrange electricity service.

Bengaluru electricity process $\neq$ Pune electricity process

So, process depends on:

City $\rightarrow$ Provider $\rightarrow$ Property $\rightarrow$ Customer Situation $\rightarrow$ Required documents

Workflow 13: Internet Setup

Similar to Workflow 12

Workflow 14: Gas Connection / Transfer

Similar to Workflow 12

Workflow 15: Water Service Setup

Similar to workflow 12 but may depend on building / society / landlord rather than utility provider.

Workflow 16 : Bank Address Change

Customers may need to ~~all~~ change or update address which requires multiple organizations and different procedures.

Suppose Customer has account in Bank A, B and C.

AI will manage as:

- Bank A → Submitted → Verification Pending
- Bank B → Completed
- Bank C → Documents missing

Workflow 17 : Government / ID Address Changes

Different documents, different processes and requirements.

Workflow 18 : Subscription Address Change

Covers recurring services the customer already uses and needs to update after relocating.

Workflow 19 : Move Completion & Customer Handover

Checklist for Quick Move and customer also.

eg.

Property → Completed	}	3 Completed 2 Pending
Mover → Completed		
Electricity → Completed		
Internet → Pending		
ID update - Pending		

Workflow 20 : Post-Move Issue Resolution

Issues during or after the Relocation

eg Customer Says, "The Movers damaged my table and they're not responding."

AI will take care of it as it identifies, what happened, how serious is it, who is responsible etc.

Workflow 21 : Local Services & City Orientation

QuickMove will help customer to understand the local area, finding essential / local services.
